Data Backup & recovery

Tasks

1. Create a backup of your WhatsApp chat history on your Android device, then locate and verify the backup file in your Google Drive or local storage.

Ans.:-

WhatsApp Chat Backup Practical – Android :-

Objective: Create a backup of WhatsApp chats and verify that the backup exists.

Part 1: Create Google Drive Backup :-

1. Open WhatsApp on your Android phone.
2. Tap ⋮ (three dots) → Settings → Chats → Chat backup.
3. Under Google Account, select your Google account.
4. Choose a backup frequency, such as Daily or Only when I tap “Back up.”
5. Tap Back up.
6. Wait until the backup finishes.
7. Check the Last backup date/time to confirm it completed.

Part 2: Verify the Backup

Open Google Drive using the same Google account and check:

Google Drive → Menu (☰) → Backups

You should see a WhatsApp backup entry if your account/device configuration supports Drive backups.

Important: WhatsApp backups in Google Drive are managed as backup data and may not appear as a normal .zip or .db file in My Drive.

Part 3: Check Local Storage

On some Android devices, local WhatsApp backups can be found using a file manager under:

Internal Storage/Android/media/com.whatsapp/WhatsApp/Databases/

Backup created: **Yes**
Google Drive backup: Verified by checking Drive → **Backups**
Local backup: **Verified by checking the WhatsApp Databases folder, if available.**

2. Simulate accidental photo deletion by moving 3 images from your phone's gallery to the trash, then restore them using your phone's built-in recovery feature.

Hint: Check the 'Recently Deleted' or 'Trash' folder in your gallery app.

Ans.:-

Photo Recovery Practical – Android :-

Objective**:** Simulate accidental deletion of 3 photos and restore them using the phone's built-in recovery feature.

Steps :-

1. Open your phone's Gallery/Photos app.
2. Select 3 photos that you don't need for this practical.
3. Tap Delete and confirm the deletion.
4. Open the Trash / Recently Deleted / Recycle Bin folder.
5. Select the same 3 photos.
6. Tap Restore.
7. Return to your Gallery and verify that all 3 photos have been restored.

The phone's built-in Trash/Recently Deleted feature allowed the accidentally deleted photos to be recovered without using third-party recovery software. Different Android phones may use different names, such as Trash, Bin, Recycle Bin, or Recently Deleted.

3. Write a step-by-step guide (with screenshots if possible) on how to schedule automatic backups of your contacts to Google Account or iCloud, so you never lose them if your phone is lost.

Ans.:-

Automatic Contact Backup Guide

You can automatically sync your contacts with your Google Account (Android) or iCloud (iPhone). This means your contacts can be restored when you sign in on a new phone.

Android – Google Account :-

1. Open Settings.
2. Go to Google → All services → Backup & restore → Google Contacts sync.
3. Turn on Sync device contacts automatically.
4. Select the Google Account where you want to save the contacts.
5. Open the Contacts app.
6. Tap your profile picture → Contacts settings → Google Contacts sync and confirm synchronization is enabled.
7. Add a test contact and wait a few moments for it to sync.
8. Sign in to the same Google Account on another Android phone to verify that the contact is available.

Verification :-

DEVICE	BACKUP/SYNC SERVICE	SETTING TO ENABLE	VERIFICATION
ANDROID	Google Account	Google Contacts Sync	Sign in on another Android device
IPHONE	iCloud	iCloud - Contacts	Sign in on another Apple device

4. Use Google Takeout to export and download a backup of your YouTube playlist data, then extract the ZIP and list the names of all playlists you backed up.

Ans.:-

I checked your Google Takeout ZIP file. It contains 3 playlists: -

PLAYLIST	NUMBER OF VIDEOS	VIDEO IDS
LOGIN PAGE	2	rKbhJY9T14E, rKwBxxVXWkM
CODE	1	UrsmFxEIp5k
WATCH LATER	1	FlBhpm9aRUg

5. Test restoring a deleted file from Google Drive's Trash: upload a sample file, delete it, then recover it from Trash and confirm it's accessible.

Ans.:-

Google Drive Trash Recovery Practical :-

Objective**:** Upload a sample file, delete it, restore it from Google Drive Trash, and verify that it is accessible.

Step 1: Upload a Sample File

1. Open Google Drive.
2. Click New → File upload.
3. Select a sample file, such as sample.txt or a small image.
4. Wait until the upload is complete.
5. Open the file once to confirm it works.

Step 2: Delete the File

1. Right-click the uploaded file.
2. Select Organize → Move to Trash (wording may vary).
3. Confirm that the file disappears from My Drive.

Step 3: Restore the File

1. In Google Drive, open Trash from the left sidebar.
2. Find your deleted sample file.
3. Right-click it.
4. Select Restore.

Step 4: Verify Recovery

1. Return to My Drive.
2. Locate the restored file.
3. Open it.
4. Confirm that the file opens normally and its contents are accessible.

The deleted file was successfully recovered from Google Drive's Trash and verified as accessible again.
