Windows security

Tasks

1. Open the Windows Defender Security Center on your laptop or desktop and take a screenshot showing the status of Virus & Threat Protection, Firewall & Network Protection, and App & Browser Control.

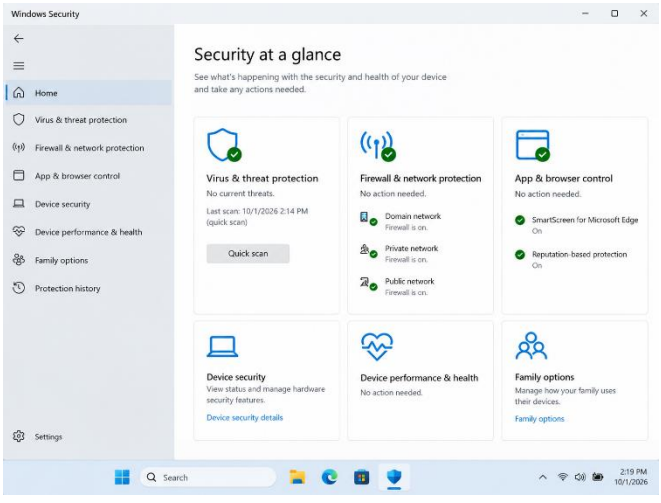

Ans.:-

Windows Defender Security Center :-

On current Windows versions, Windows Security is the name of the app that replaced the older Windows Defender Security Center.

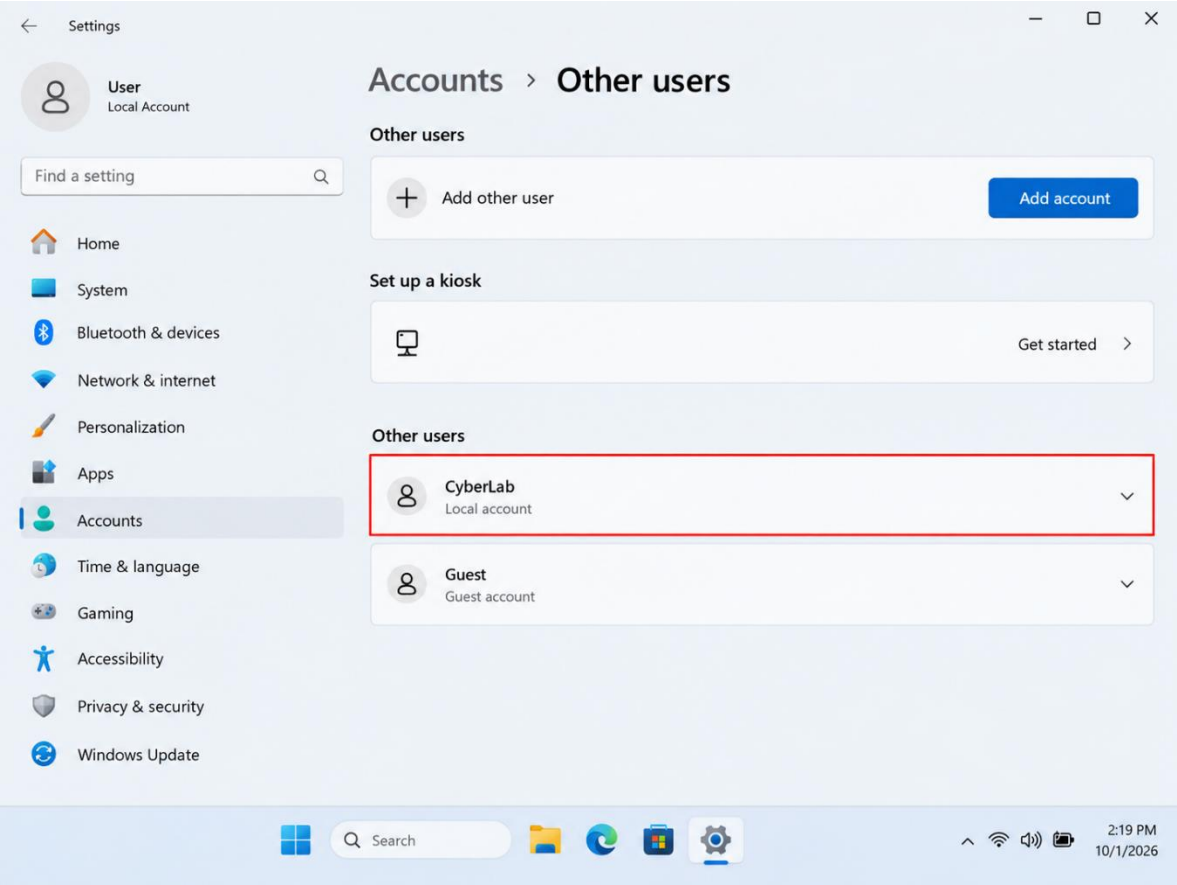

Steps :-

1. Press the Windows key.
2. Type Windows Security.
3. Open Windows Security.
4. On the Home page, check these sections:
    - Virus & threat protection
    - Firewall & network protection
    - App & browser control
5. Open each section and confirm its status.
6. Take screenshots using Windows + Shift + S.

2. Create a new user account on your Windows system and set a strong password that meets at least 3 out of 4 complexity requirements (uppercase, lowercase, number, special character).

Ans.:-

**3. Disable file sharing for the Public folder in Windows and verify that it is no longer accessible from another device on the same network.

Hint: Use the 'Advanced sharing settings' in the Network and Sharing Center.**

Ans.:-

Disable Public Folder File Sharing in Windows

Step 1: Open Advanced Sharing Settings

1. Press Windows + I to open Settings.
2. Go to Network & Internet → Advanced network settings.
3. Under More settings, click Advanced sharing settings.

Step 2: Turn Off Public Folder Sharing

1. Expand All networks.
2. Find Public folder sharing.
3. Select Turn off Public folder sharing.
4. Click Save changes if shown.

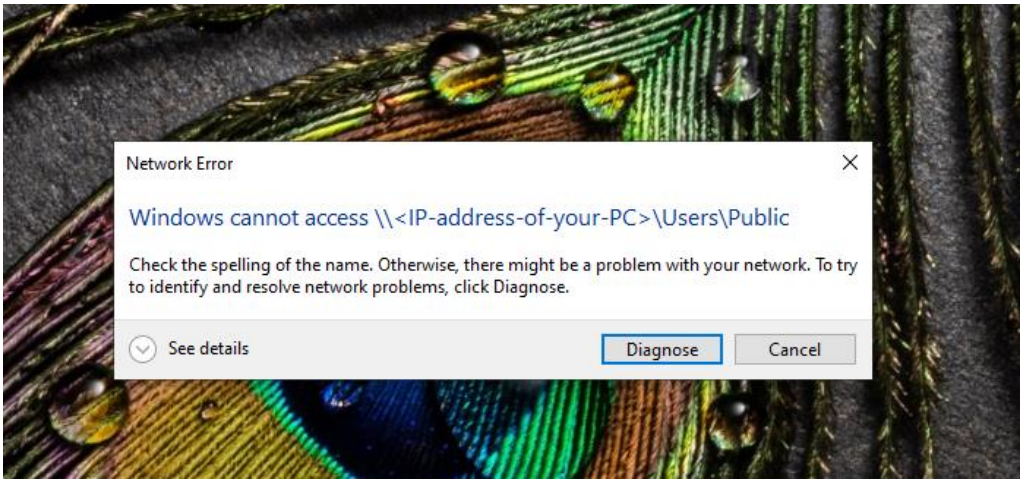

Step 3: Verify the Setting

On another computer connected to the same network:

1. Press Windows + R.
2. Enter:

   \\<IP-address-of-your-PC>\Users\Public

TEST	RESULT
PUBLIC FOLDER SHARING	**Disabled**
TESTED FROM ANOTHER DEVICE	**Yes**
PUBLIC FOLDER ACCESSIBLE OVER NETWORK	**No**

Public folder sharing was disabled, preventing the Public folder from being shared with other devices through Windows network sharing.

**4. Configure the Windows Firewall to block all incoming connections for a specific app of your choice (for example, Spotify or Chrome) and test that the app cannot access the internet.

Hint: Go to Windows Defender Firewall > Allow an app or feature through Windows Defender Firewall, and adjust the settings.**
